

# Getting Started

When you're connected to the internet, you can conveniently listen to your audio via your online account at [crushendo.com](http://crushendo.com). This is true whether you're on a computer, tablet, or mobile device.

But if you want to listen to downloaded audio files offline, there's some short setup. Depending on your tech savviness, you may benefit from the following step-by-step guides.

ANDROID

# SETUP

1.

Download desired audio ZIP file.

Contracts (2.3) Audio

2.

Open the Files app.

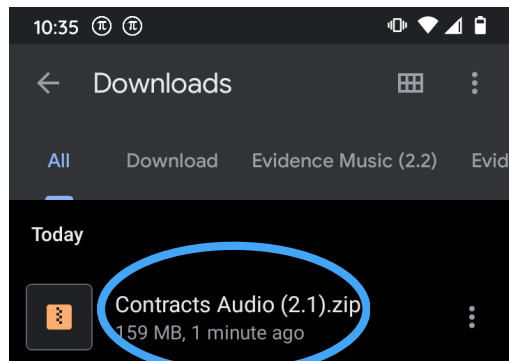

3.

Select "Downloads."

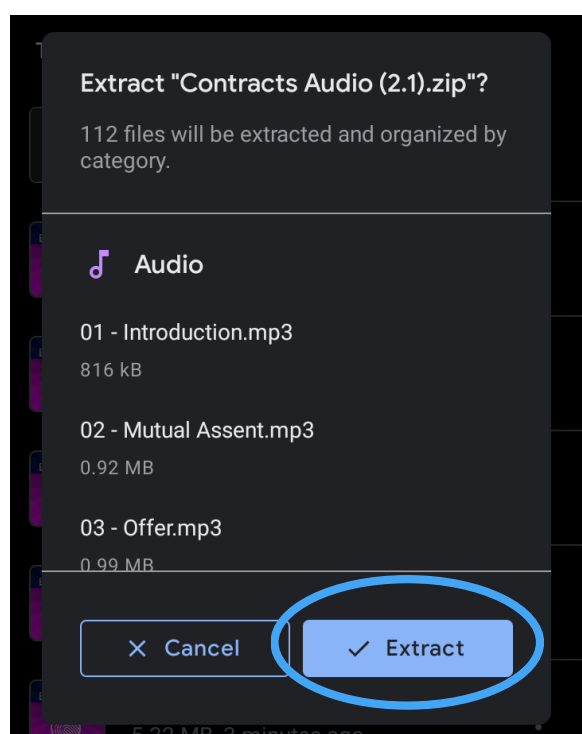

4.

Select the ZIP file you downloaded.

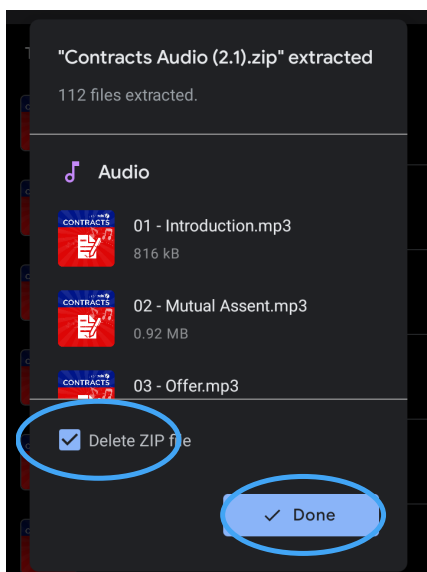

5.

Tap "Extract."

6.

Delete ZIP file to free up space. Tap "Done."

7.

Open device's music player.

Optional: The default Android music player on many phones has no individual repeat function. Consider downloading and using a more robust player, like:

# ios SETUP

1.

Make sure you have the Files app, or another file organizer, on your device.

2.

Download the audio .zip file and make sure to keep device unlocked while it's downloading.

3.

Open and select "Save to Files".

4.

Save it on your device or to another location, like Dropbox.

5.

Click on the saved .zip file to unzip it.

6.

Open a music player that can import files and play MP3s, like the Nota app.

7.

Create a folder/playlist for your audio outlines.

8.

From the folder/playlist, choose to "Import Files."

9.

Select the unzipped folder from your file provider.

10.

Choose the audio with or without background music.

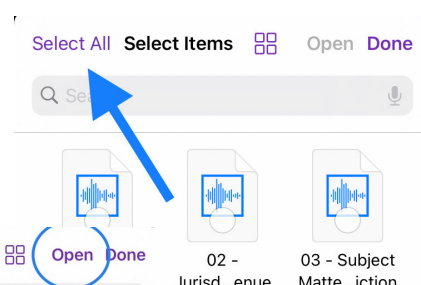

11.

Once you see all the individual audio files, open Options and choose "Select."

12.

Choose "Select All."

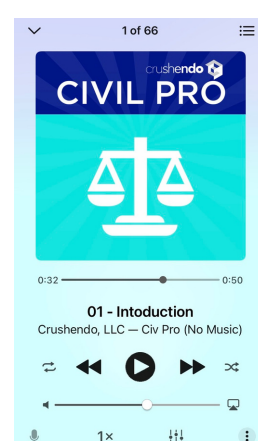

13.

Select "Open."

14.

Once your files are sorted how you like in the desired folder/playlist, you're ready!
